

Wade Tutt has been in the construction and restoration industry since 1999. Wade started his career in residential new construction and soon thereafter developed a passion in blueprint takeoffs and estimating. Wade served as an estimator, consultant and project manager with a team that built thousands of house and commercial buildings in the early 2000's. Wade's expertise at deciphering complex drawings transferred to increase his knowledge of on-site construction methods. Wade spent the following eight years as a residential and commercial materials expert in fields like roofing, framing and building envelope weatherization.

Wade began applying his construction expertise as the General Manager of one of the largest Public Adjuster firms in the Midwest. He oversaw a team of 30+ Public Adjusters and in that time has supervised the successful adjustment of over 2500 claims. Wade's particular specialty is in commercial roofing materials and applications. He has a unique mix of experience in roofing materials, applications and a vast knowledge of insurance policy coverage application. With those skills, Wade can accurately assess the damage that many buildings sustain and immediately understand the coverage that should be applied.

Along with his partner, Wade co-founded Paramount Adjusters, a National Public Adjusting firm with offices in 13 states. Paramount has built a team of coverage and construction experts that have been operating in the first party loss insurance industry for decades. Paramount's unique strength is commercial roofing adjusting and appraisals. Paramount strives to provide the best in customer service to the policyholders and the contractors that are so often involved in the rebuilding process.
